

Google Classroom

Google Classroom is a free blended learning platform developed by Google for educational institutions that aims to simplify creating, distributing, and grading assignments. The primary purpose of Google Classroom is to streamline the process of sharing files between teachers and students.

Striking features of Google classroom are listed below:

For Teachers:

- a. Easy to start a video meeting.
- b. Teachers can create and manage classes, assignments, and grades online without paper.
- c. They can add materials to your assignments, such as YouTube videos, a Google Forms survey, and other items from Google Drive.
- d. They can Give direct, real-time feedback.
- e. Easy to use the class stream to post announcements and engage students in question-driven discussions.
- f. Even they can invite parents and guardians to sign up for email summaries with a student's upcoming or missing work.

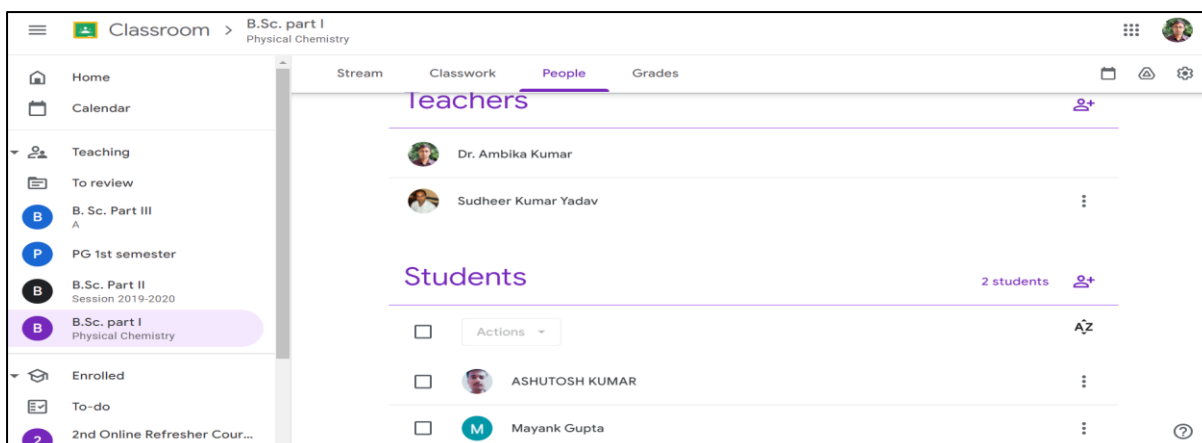

For Students:

- a. Students can track classwork and submit assignments.
- b. They can check originality, feedback, and grades.
- c. Students can easily share resources and interact in the class stream or by email.

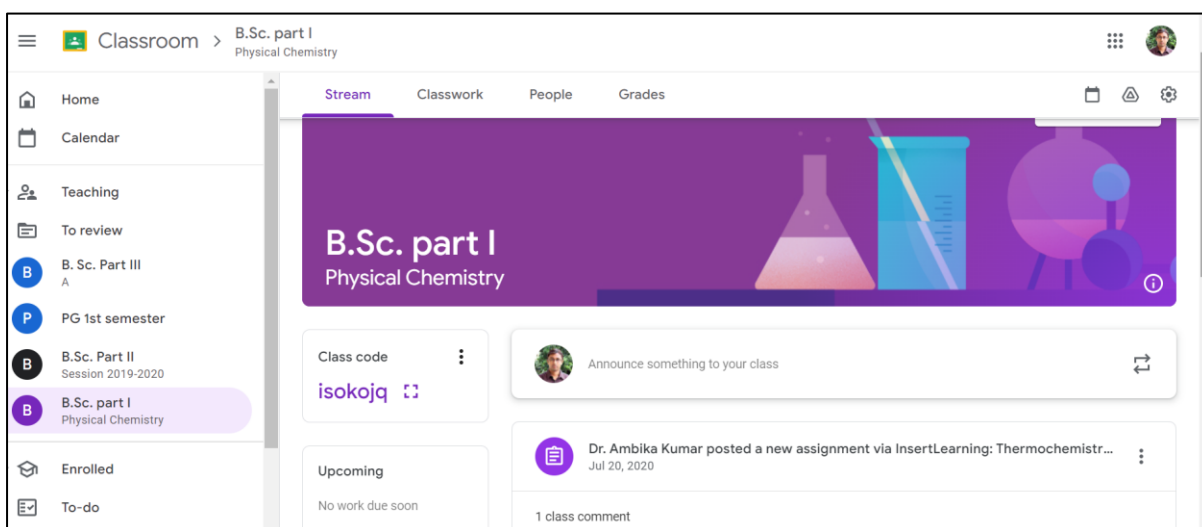

Specially during COVID-19 pandemic, this platform for teaching – learning was massively adopted by most of the faculty members. It has been observed as the one of the best virtual modes for the teaching-learning system.

Report on the conduction of Google Classroom:

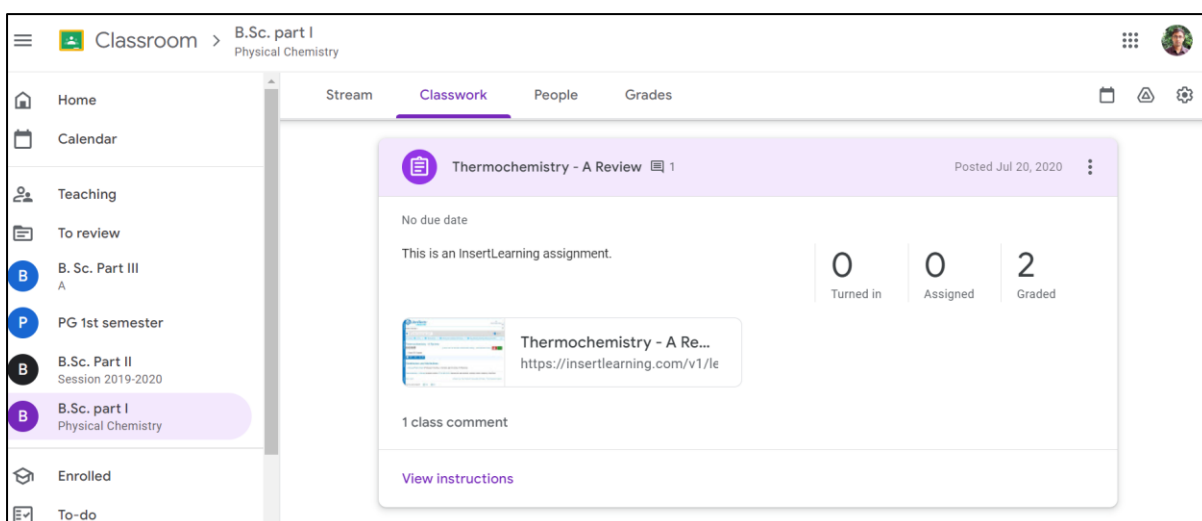

The classroom was created with a co-teacher and two topper students of B.Sc. Part I (Chemistry Hons.)

Link and class code was distributed among concerned students:

Classwork was assigned among students:
